

## INFORMATION ABOUT THE BRAND

Originating from the KKT Kraus Company (est. 1978), the current KKT chillers brand is an important pillar within ait-deutschland GmbH. Having been integrated into the Swedish NIBE Group, owing to its KKT chillers brand, ait-deutschland GmbH has become one of the leading manufacturers of heating and cooling systems.

No matter whether you are looking for process cooling, heating and cooling solution for industrial or technical building applications, energy saving systems, heat recovery, passive heat exchange stations or water management systems with the corresponding services: KKT chillers provides you with the perfect synergy as a success formula in cooling and heating - "made in Kasendorf." The resulting product pallet ranges from serial production-oriented standard devices to customized products.

KKT chillers has been internationally recognized as being a reliable partner and quality-conscious manufacturer of energy-efficient solutions in refrigeration and air conditioning technology. The customers of KKT chillers value the quality of their products and the high technical expertise of the employees that has been recognized. Our high quality standards have also been recognized by numerous organizations, associations and institutes. With all our products, the highest quality, operational safety, sustainability, design and an ecologically and financially well-balanced concept are of prevailing importance to KKT chillers.

KKT chillers has long become a full-fledged global player in the chiller market, thanks to the two sites in Germany and the US as well as the global service network – plus the priceless benefit of technological development and production “made in Germany”.
